

**It is a great pleasure for me to introduce the products of KRUS Electronics Ltd.**, the company which we launched in 1991 together with my colleagues from the Institute of Microelectronics -

**Rumen Petrov**

and

**Krassimir Krustev.**

Our long-time experience in microprocessor and microcomputer IC design was crucial for establishing KRUS Electronics Ltd. as a leader in engineering, manufacturing and installation of alarm and access control systems on the Bulgarian market. Highly qualified hardware and software designers, test and service engineers and technicians are working for the company now. Their experience and dedication is a guarantee for high quality products aimed at company's primary target: our customers' security and safety.

**In these years we, at KRUS Electronics Ltd., have developed and manufactured**

many electronic devices and systems. We offer a great variety of burglar alarm systems and components, integrated systems for access control, time attendance and video-surveillance, complete hotel management, etc. Hundreds of our systems have been installed around the country and they are working successfully. The network of our representatives and distributors is constantly expanding. We were awarded a gold medal at 55-th International Technical Fair, Plovdiv 1999 as recognition for our achievements in the field of the integrated systems for video-surveillance, alarm and access control.

Management system of KRUS Electronics Ltd. certified according to ISO 9001:2008
